## EDUCATION

**Oakland University** | Auburn Hills, MI

*Bachelor of Science: Computer Science (GPA 3.8/4.0)*

## EXPERIENCE

**ACLU** | Remote (Chicago, Illinois)

*April 2025 - Present*

*Software Engineer II (DevOps)*

- Build and maintain shared infrastructure and tooling for product and technology teams using AWS, Terraform, GitHub Actions, and scripting
- Built automation to standardize and streamline deployments across 53 affiliate websites

**McDonald's Global Technology** | Hybrid (Chicago, Illinois)

*June 2024 - April 2025*

*Cloud Infra Engineer*

- Setting global standards across the company for provisioning and configuration of servers and endpoints. Primarily using Microsoft cloud technologies, Terraform, Google Cloud, and AWS. Using SQL to query databases for reporting/analytics
- Building and maintaining custom tools for generating and deploying endpoint/server images, using scripting languages (Powershell), C# and .NET framework
- Took ownership for the company's endpoint gold build and image creation process (affecting over 1M endpoints globally)

**DebtBook** | Remote (Chicago, Illinois)

*January 2023 - March 2024*

*Software Engineer II*

- Built Rails APIs and React frontend features, including a documents listing page
- Led a permissions refactor for new user types by redesigning Pundit policy inheritance, expanding test coverage with MiniTest, and standardizing frontend components
- Managed Postgres migrations, wrote SQL/ActiveRecord queries, and supported production triage through on-call using Rollbar and Datadog

**Bankrate (Red Ventures)** | Remote (Chicago, Illinois)

*June 2021 - December 2022*

*Software Engineer*

- Worked with Terraform & AWS to spin up and manage infrastructure. Used various services including AWS S3, AWS EC2, AWS CloudWatch and AWS Glue. Implemented logging with Rollbar & New Relic
- Worked and maintained backend users databases. Regularly wrote and ran SQL queries to provide reporting to Product Managers (and other stakeholders)
- Used React, Redux, and Next.JS to integrate with a 3<sup>rd</sup> party vendor (RTM) to implement a sweepstakes campaign, driving 20k new account creations, increasing feature engagement and bringing an additional \$75k in revenue
- Used React and Redux to build an onboarding flow in the Bankrate application, guiding users throughout the app and increasing overall engagement with features in the app for new users by 168%. Wrote end to end tests with Cypress and unit tests with Jest
- Used React, Redux and Node to build out a quiz tool and a course platform within the Bankrate app's learning center; Built landing pages using NextJS and Laravel for courses that are automatically generated through data that the content team adds in Storyblok (a 3<sup>rd</sup> party CMS). Wrote end-to-end tests and setup a CI/CD pipeline using CircleCI

## TECHNICAL SIDE PROJECTS

**Ghost Buses (2022-2024)** - <https://ghostbuses.com/>

- Helped build and help maintain a web app tracking bus reliability in Chicago. Learn more [here!](#)

**Startup Detroit (2018-2020)** - [www.startupdetroit.co](http://www.startupdetroit.co)

- Run and maintain an open source project and site built in ReactJS, to unite the Detroit startup community.

## LEADERSHIP/COMMUNITY

**Chi Hack Night, Board Member**

*Aug 2022 - Present*

- Appointed board member to a nonprofit organization organizing around civic technology in Chicago, Illinois.

**Road to Hire, Mentor**

*Jan 2022 - Present*

- Assisting with interviews/admission; Mentoring individuals in the program on technical topics on a weekly basis.

## SKILLS

**Technical:** Java, JavaScript (Node, React, Vue, TypeScript), PHP, Python, Ruby, HTML, CSS (Tailwind, Bulma, SASS), SQL

**Tools:** Git, Android Studio, Postgres, Docker, AWS, Terraform, CircleCI, Fastly, FileZilla, Adobe Illustrator
